I am an Associate Professor at the Department of Urbanism at the Faculty of Architecture and the Built Environment at the TU Delft and Visiting Professor at the Faculty of Architecture at KU Leuven. I am an urban planner, an architect, and a political scientist. My work and research focus on the social and political dimensions of design. My research interests encompass (informal) housing and participatory upgrading, the complexity of architecture and planning in post-colonial contexts, intersectionality in/for design and planning, and the methodological and pedagogical challenges of designerly knowledge production. I advocate for revitalised urban professional participation, and the reintroduction of advocacy to the forefront of planning and spatial practises. I advance a critical and involved approach to strategic planning, presenting planning techniques as acts of resistance and as enablers of alternative spatial possibilities and imaginations.

Since the beginning of 2019, I have been the Van Eesteren Fellow at TU Delft's Faculty of Architecture and the Built Environment, Department of Urbanism.

# Teaching

As a teacher whose interests are the interrelation between spatial and social structures, between architecture, design and politics, I believe it is essential to create a safe (learning) environment in which students can question the concepts of power, spatial justice, right to the city, participatory design, and the role of the planner/architect/designer.
